## POWERFONE

### CORDLESS INTERPHONE SYSTEMS

Thodukonics Introducing advanced intercommunication equipment Powerfone. The main advantage of the Powerfone is that, this intercom phone requires no any wiring as it works on the 110/230 volt ac electric power supply lines. You will get the maximum operating range on the same transformer in the same phase electric lines. As we use high quality components and precision tuned electronic oscillator circuits and also the advanced FM technologies in our systems, you will get the digital clarity conversation and long range than the same products available in the global market place.
